

MESSAGE FROM THE TRIAL TEAM: STUDY DRUG PROVISION!

As recently announced, we are thrilled plans are underway for study drug to be provided to all current and future trial subjects in the intervention arm! Over the past few months, we have been diligently working to secure this benefit to overcome drug access and cost concerns, allowing more subject enrollments at each hospital. Our central pharmacy, The Almac Group, will be supplying direct-to-patient drug shipments reducing the need for any institutional pharmacy resources. A number of central pharmacy trainings are underway and we will provide more details as they become available. Stay tuned for more details on this exciting development! Additionally, sites will need to expedite a number of tasks surrounding clinical trial agreement amendments and IRB modifications, but please await instructions from our regulatory staff.

We look forward to discussing this change and trial progress with participating sites at our upcoming Investigator Meeting on April 25th in Washington, DC!

TRIAL LEADERBOARD

CHANGE AFib 62 Subject Enrollments

REMINDERS FOR SUCCESSFULLY ENROLLING IN 2023

- **Screening Strategies:** Use a multi-pronged approach by manually reviewing inpatient and outpatient lists (ER, cardiology, etc.) then supplementing with EMR report reviews. *There is no substitute for hands-on chart reviews compared to EMR reports reviews!*
 - Ensure your site has a mechanism in place to screen patients admitted/discharged on weekends, holidays, etc.
- **Outpatient Recruitment:** Aim for trial introduction by clinical team and coordinator while inpatient. Review weekly clinic schedules.
- **Trial Visibility:** Promote trial regularly at departmental meetings and grand rounds using trial pitch deck, provider pocket cards & patient brochure. Collaborate with inpatient teams for referrals and patient management.
- **Multi-disciplinary Teams:** Ensure all high visibility areas have team representation, allowing for no eligible patient to be missed!

TRIAL UPDATES: December – February!

WELCOME DEC, JAN & FEB ACTIVATED SITES:

December

- Duke University Hospital (Durham, NC)
- Mayo Clinic Hospital – Franciscan Healthcare La Crosse (La Crosse, WI)
- Captain James A Lovell Federal Health Care Center (North Chicago, IL)
